Network Infrastructure

Maximize Your Business Potential with a Strong Network Infrastructure that ensures your business has a solid foundation for seamless operations. We conduct thorough network assessments to determine your specific needs regarding capacity, bandwidth, security, and resilience.

With our expertise, we design, implement, and maintain a robust network infrastructure that supports high functionality, enhances employee productivity, and improves communication channels, ultimately leading to increased customer satisfaction.

- **Wireless**
- **Switches**
- **Routers**
- **VPN**

Structured Cabling Services

Support your LAN and Ethernet for optimal performance and reliability. We tailor the cabling system to meet the specific IT requirements of your business, considering factors such as workspace layout and network infrastructure. Our certified technicians conduct thorough **design, implementation and testing** a robust structured cabling system that promotes simplicity, saves time, and provides an organized infrastructure for efficient network management. Experience seamless data movement and enhanced hardware security with our structured cabling solutions.

- Copper
- Fiber
- Network Cabinet
- Test Fluke

Security

Our Security service offers cutting-edge IT security solutions to shield your business from cyber-attacks. With a focus on designing breach-free security systems, our specialists analyze network systems to implement layered network security measures. By providing expert **design, installation, configuration, assessment, and troubleshooting services**, we protect your IT systems, enhance productivity, maintain trust and credibility with your customers, and reduce the risk of internal threats.

Safeguard your business and gain peace of mind with our comprehensive security solutions.

- **Firewall**
- **Endpoint Security**

High-Performance Computing

Through HPC solutions, your business will have the ability to develop new products, innovate effective processes, and define new opportunities. With our customizable and scalable HPC solutions, we provide efficient implementation, configuration, virtualization, consultation and Sizing options to meet your specific needs. Our experts conduct thorough assessments, ensuring optimal performance and adherence to Service Level Agreements (SLAs). Additionally, we offer troubleshooting services to address any issues promptly, allowing you to unlock the full potential of your data and accelerate your business operations.

- Servers
- Storage
- Backup

Data Center

Optimize your IT workloads by providing reliable data center infrastructure. With our expertise in data center design, assessment, installation, movement, and migration, we ensure a secure and efficient environment for your critical data storage, backup, and recovery needs. Our comprehensive solutions include a well-designed cooling system, firefighting systems, DCIM solutions for real-time management, raised floor installations, and access control measures. safeguard your valuable information and unlock your business's full potential.

- Cooling System
- Firefighting
- DCIM Solutions
- Raised Floor
- Access Control

Unified Communication Solutions

Enable transparent communication and collaboration among your employees, regardless of their locations, with our comprehensive solutions. Our experts provide installation, configuration, design and troubleshooting services for VoIP and Microsoft 365, ensuring seamless integration and optimal performance. With cloud servers for efficient file storage and sharing, your teams can work together seamlessly, achieving optimal performance and streamlined collaboration. Experience smoother business operations and improved outcomes with our unified communication tools and deep-rooted solutions that support collaborative relationships and enhance overall business management.

- VoIP
- Microsoft365

IT Power Solutions

Our IT Power Solutions provide reliable and efficient uninterruptible power supply (UPS) systems to protect your data and shield your devices from power damage. We offer APC single-phase UPS devices, ideal for smaller data centers and edge computing installations, and three-phase UPS systems for enterprise-wide networks and mission-critical systems. As an Authorized Service Center for Schneider Electric, our certified team delivers comprehensive support, including regular visits, UPS assessments, emergency services, UPS installation (wiring & startup), and battery installation. With our expertise and commitment to Service Level Agreements (SLAs), we ensure your power solutions are optimized and your business operations remain uninterrupted.

- Single Phase
- Three Phase
- SLA

Retail Solutions

iNetwork Solutions is a trusted consultant and system integrator in the retail sector, offering comprehensive backend **infrastructure services**. Our solutions encompass **Network, Security, IT Power, Data Center, Server Room, wireless Connectivity,** and **WAN & LAN Solutions.** Leveraging advanced technology, we ensure seamless connectivity, reliable operations, and enhanced security for your business. Transform your retail experiences with innovative front-end solutions, including **POS Solutions, Scales Solutions, and Handheld Devices.**

Our offerings streamline operations and provide a seamless and user-friendly retail experience, while our backend solutions further enhance performance and reliability in areas such as server room management, wireless connectivity, and network infrastructure.

OUR SERVICES

Professional Services

Our team of experienced professionals provides a wide range of services to ensure the optimal performance and security of your IT infrastructure, specializes in **Design** and **Configuration**, **Installation**, and **Health Checks** to ensure the optimal performance and security of your IT infrastructure.

Our Services:

- **Network Services:**

- Network configuration and optimization.
- Network health checks and troubleshooting.
- Wireless network design and deployment.
- Service Level Agreement (SLA) support.

- **Security Services:**

- Firewall configuration and optimization.
- Antivirus installation and configuration.
- Security policy implementation and enforcement.
- Security incident response and remediation.
- Security healthy check
- SLA support.

Professional Services

Our Services:

- **High-Performance Computing Services:**

- Virtualization services installation and configuration.
- Server and storage configuration.
- Server and storage health checks and troubleshooting.
- SLA support.

- **Data Center Services:**

- Data center design and planning.
- Data center installation and migration.
- Data center health checks and maintenance.
- Data center relocation and consolidation.
- SLA support.

OUR PROJECTS

- ✓ **+100K** complete UTP Data Point.
- ✓ **+150** KM Fibber Cables and Splicing,
- ✓ **+3K** Optical Cores Data Termination.
- ✓ **+20** Data Centre Design & Implementation.
- ✓ **+6k** Network & Security Equipment Implementation.
- ✓ **+150K** Fluke Tested with a certified report for end to end Network Points.
- ✓ **+10K** IT Power Solutions Installation and Start-Up (Single & Three phase UPS).
- ✓ **+50** Signed SLAs
